Washington, DC 20515

The Honorable Jamie Raskin  
2242 Rayburn House Office Building  
Washington, DC 20515

Dear Representative Trone, Representative Raskin, and Representative Fitzpatrick:

On behalf of the Mental Health Liaison Group (MHLG) – a coalition of national organizations representing consumers, families, mental health and addiction providers, advocates and other stakeholders committed to strengthening access to high-quality mental and behavioral health care – we write to express strong support for H.R.6928, the *CONtinuity in Necessary Evaluative Crisis Treatment (CONNECT) Act*. We are grateful for your ongoing commitment to improving crisis response services in the United States.

The reintroduction of this bill comes at a critical time. In 2021, the United States lost 48,183 individuals to suicide, with provisional data indicating a 2.6% increase in suicide deaths for 2022.<sup>i</sup> In addition, one in every five adults experience mental illness each year in the United States, but fewer than half of all adults in the U.S. with a mental illness received treatment in 2021.<sup>ii</sup>

The *CONNECT Act* will authorize grant funding opportunities to help crisis centers provide follow-up treatment for individuals receiving suicide prevention and crisis intervention services. Eligible grant recipients will receive funding through the U.S. Department of Health and Human Services to help provide follow-up services, including check-ins to assess wellbeing and level of risk; outreach to ensure engagement in services and supports; collaboration with family, caregivers, and natural social supports; and referrals based on the individual's needed level of care.

The Substance Abuse and Mental Health Services Administration (SAMHSA) states that a comprehensive crisis response system should include follow up and follow through services to engage individuals in crisis with local behavioral health services.<sup>iii</sup> Research has indicated that nearly 80% of follow-up clients report that intervention helped prevent them from attempting suicide and over 90% said it kept them safe, demonstrating that follow-up is a critical intervention to help support individuals at risk of suicide.<sup>iv</sup>

The 988 Suicide & Crisis Lifeline represents a one-in-a-lifetime opportunity to build out the nation's behavioral health crisis care response system. Efficient and effective follow-up for those who seek crisis services is necessary to support this goal. The *CONNECT Act* is vital to saving lives and enhancing the 988 crisis care system.

Thank you for your continued commitment to improving America's crisis response systems, and we look forward to working with you to advance this important legislation.

Sincerely,
